Step 1: Connect the battery

Note

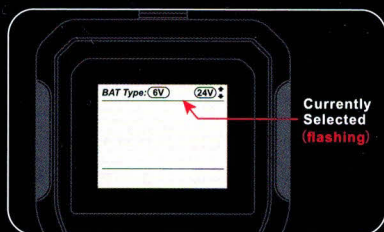

- 1 Screen flash. (The clips not properly clamped, please reconnect)
- 2 Reverse protection. (Even the positive and negative polarity is wrong, it will not damage the equipment and battery)

Step 3: Enter CCA

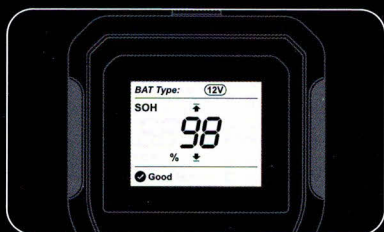

Press button to adjust the input value, press button to test.

Step 2: Select the battery type

Press button to switch battery type, press to confirm.

Step 4: View the test results

Press button to switch test result. (Long press button to homepage, press button back to previous select page.)

Tips:

- ✓ Good. (The battery is in good condition, feel free to use)
- ⚠ Normal. (General state of the battery may continue to use)
- ✗ Poor. (The battery is in poor condition, please replace it in time)

No.	Abbreviation	Name
01	SOH	Status of Health
02	SOC	Status of Charge
03	R	Internal Resistance
04	VOL	Battery Voltage

Parameters

Product Name: Battery Tester

Model: TE503

Display: 1.8 inch high-definition backlit screen

Test Range: 6V/12V/24V

Connection Method: Positive and negative alligator clips

Operating Voltage: 4.9V ~ 32V

Operating Temperature: -4°F ~ 122°F (-20°C ~ 50°C)

Product Size: 4.88×2.74×0.89 inch (124×69.6×22.6 mm)
